Allowable Subject Matter

Claims 1-8 are allowed.

The following is an examiner's statement of reasons for allowance: The instant claims are allowable over the instantly cited prior art at least because none of the cited prior art shows or fairly suggests a low alloy steel of the compositions recited in either instant independent claims 1 or 2, where the steel includes at least 10 pieces per 0.1mm^2 of inclusions of not greater than 7 microns in a major axial direction, where the inclusions comprise an outer shell of a carbonitride surrounding a nucleus of an oxysulfide of Al and Ca. the closest cited prior art (Japanese'739), as pointed out by applicant in the response and amendment filed on 11/16/2005, does not recite either identical compositions (the compositions overlap) or identical processing steps (cooling from casting a casting temperature of 1500°C to 1000°C at no more than 500°C per min., the JP'739 reference recites no specific cooling control), and therefore cannot be fairly said to inherently result in a similar structure. Further, the JP'739 reference also includes inclusions of a size larger than 20 microns, and in the 19 examples provided in JP'739, never recites inclusion sizes any smaller than 18 microns.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Scott Kastler whose telephone number is (571) 272-1243. The examiner can normally be reached on Monday through Friday.
